

# SPECTRO3-COMFORT-Scope Changes after software update from SPECTRO3-COMFORT-Scope V1.1 to V1.2

The text below summarises the changes that were made with the software update from **SPECTRO3 COMFORT Scope V1.1** auf **V1.2**.

Color sensors of the following types can be quickly parameterised with the SPECTRO3-COMFORT-SCOPE software:

- SPECTRO-3 in M34 housing starting from version 4.4
- SPECTRO-3-CL starting from version 4.4
- SPECTRO-3-JR starting from version 4.4
- SPECTRO-3-SL starting from version 1.3
- SPECTRO-3-SLE starting from version 1.1

For previous versions please use SPECTRO3-COMFORT-SCOPE V1.0.

The software features menu guidance that prompts the user to enter all the relevant parameters.

## There is only one change:

The panel size has been increased and the font has been changed due to the better presentation, so that in the future no scaling problems should occur.
