

# SPECTRO-3 series

## Changes from SPECTRO3-DLS-Scope V3.2 to SPECTRO3-DLS-Scope V4.2

The changes that were made from Spectro3-DLS-Scope V3.2 to V4.2 are quite important.

Except for the second **POWER** slider and the missing **POWER MODE** parameter, the Spectro3-DLS-Scope V3.2 version was identical with the Spectro3-Scope V3.2 standard version.

The same applies to the Spectro3-DLS-Scope V4.2 version, which except for the **POWER EXTERN** slider is exactly the same as the Spectro3-Scope V4.2 standard version.

Changes that were made between the individual versions are therefore summarised in the following manuals.

General Info Changes SPECTRO3-Scope V3\_2 to V3\_3

General Info Changes SPECTRO3-Scope V3\_3 to V4\_0

General Info Changes SPECTRO3-Scope V4\_0 to V4\_1

General Info Changes SPECTRO3-Scope V4\_1 to V4\_2

It is possible to update the software from V3.2 to V4.2. In this case, however, an intermediate step is required to save the data.

The respective procedure is exactly described in the "[Firmware update SPECTRO3 V3.x to SPECTRO3 V4.x](#)" file.
